CUSTOMIZATION

Signature Products can provide custom products with a smooth process and a fast turnaround. Custom design requests can be completed by applying changes to existing product designs or even engineering a product from scratch. Examples of customization include frame size changes or modification of cable entry/exit points. With over 50 years of experience Signature Products will collaborate with customers to determine the best solution to meet their expectations.

Customization Process

- Identify customer requirements
- Preliminary drawings provided
- Approval of design and drawings
- Typical product completion as your needs
- Custom colors available upon request
